NATIONAL MARINE
SANCTUARIES

Ron LeValley

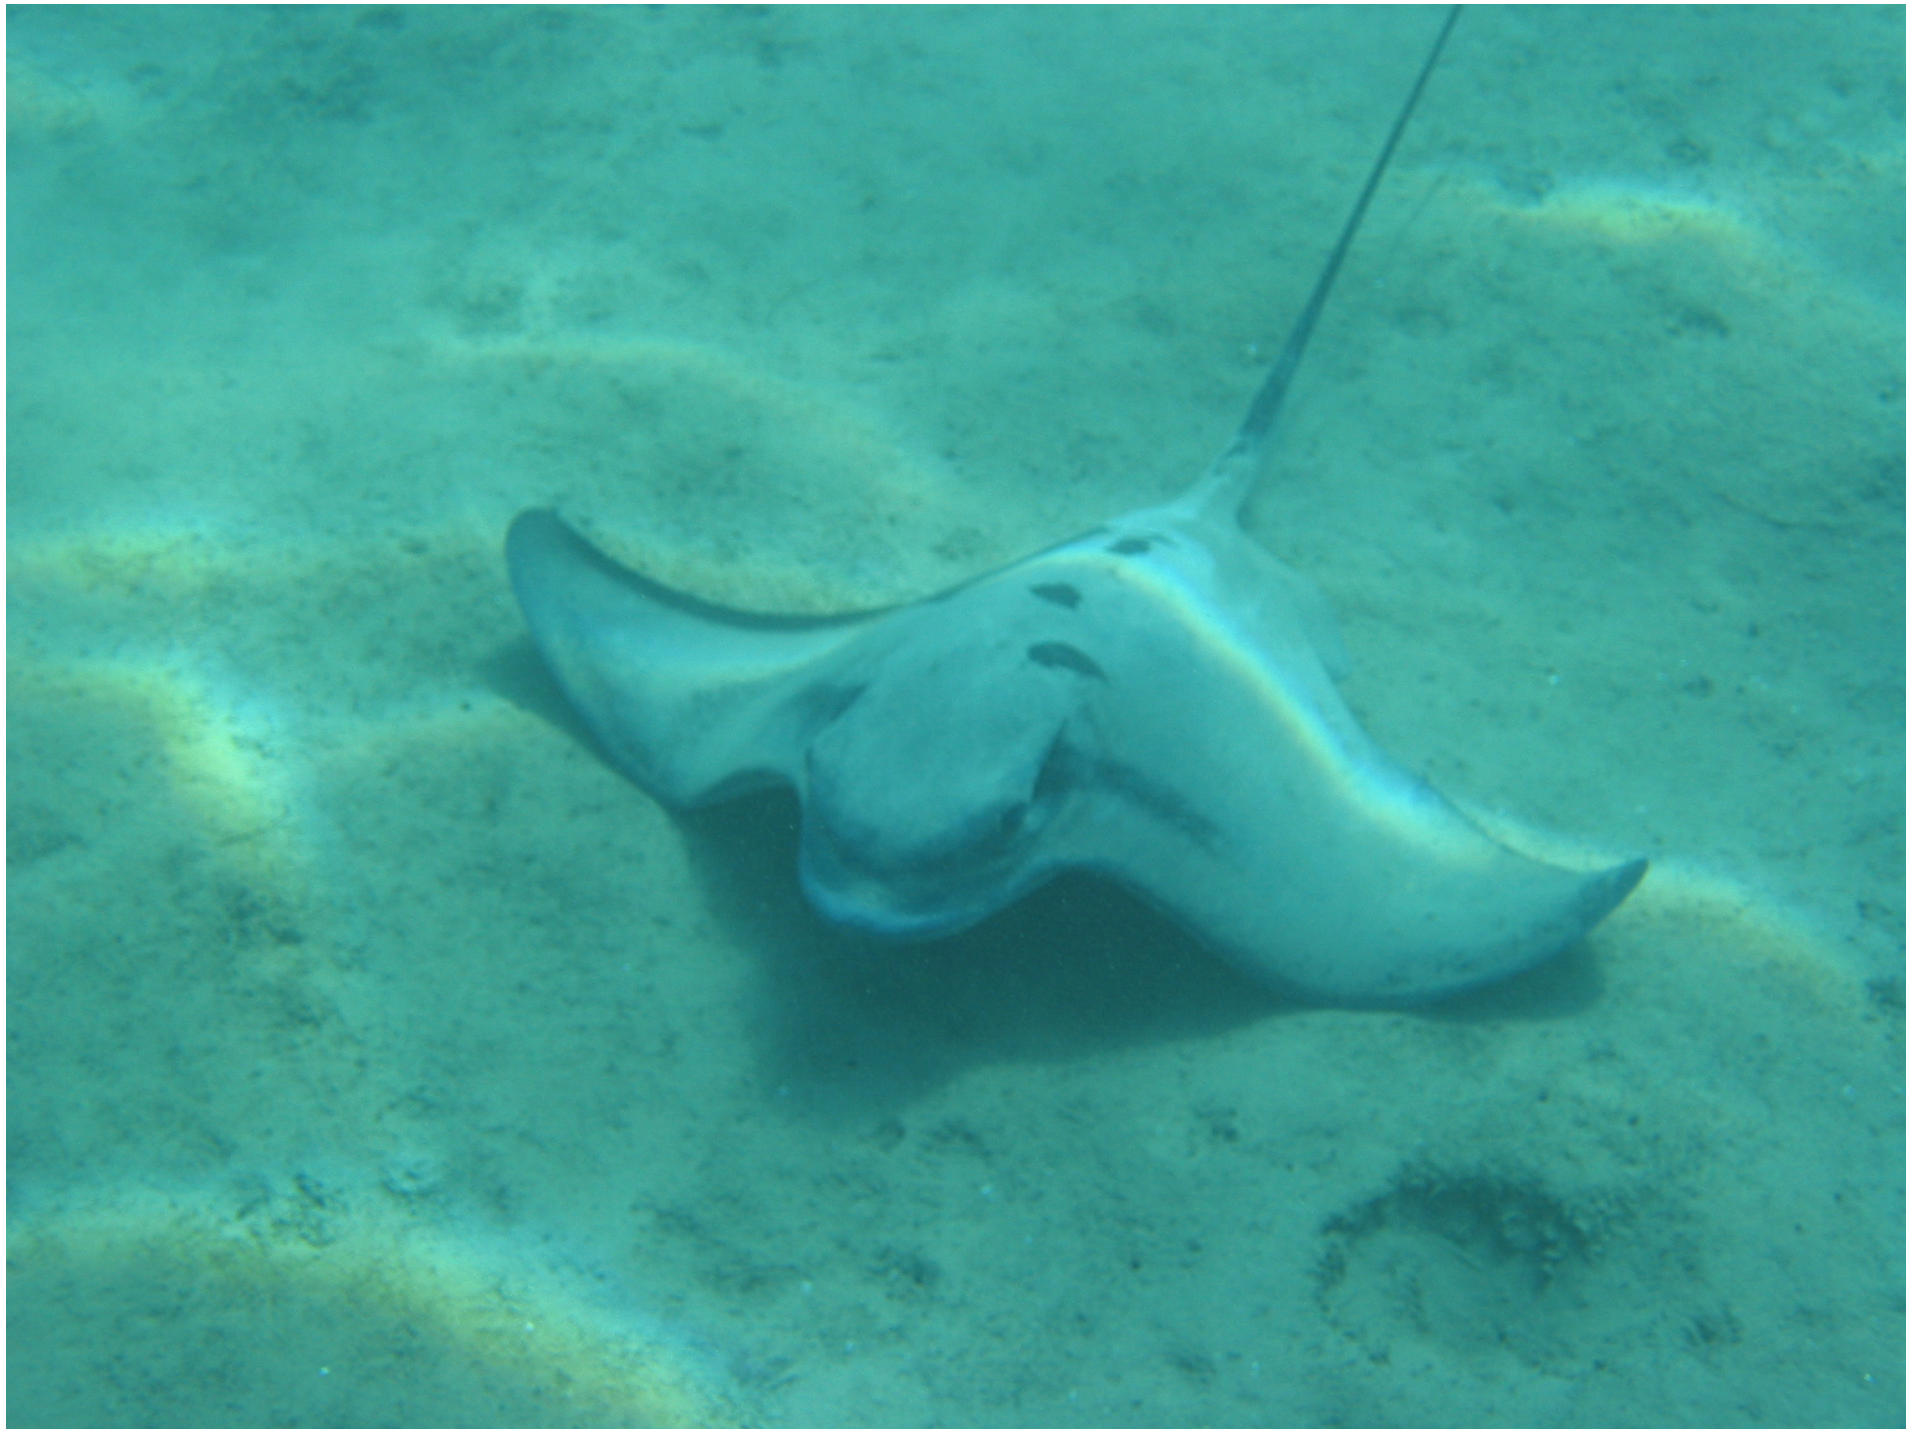

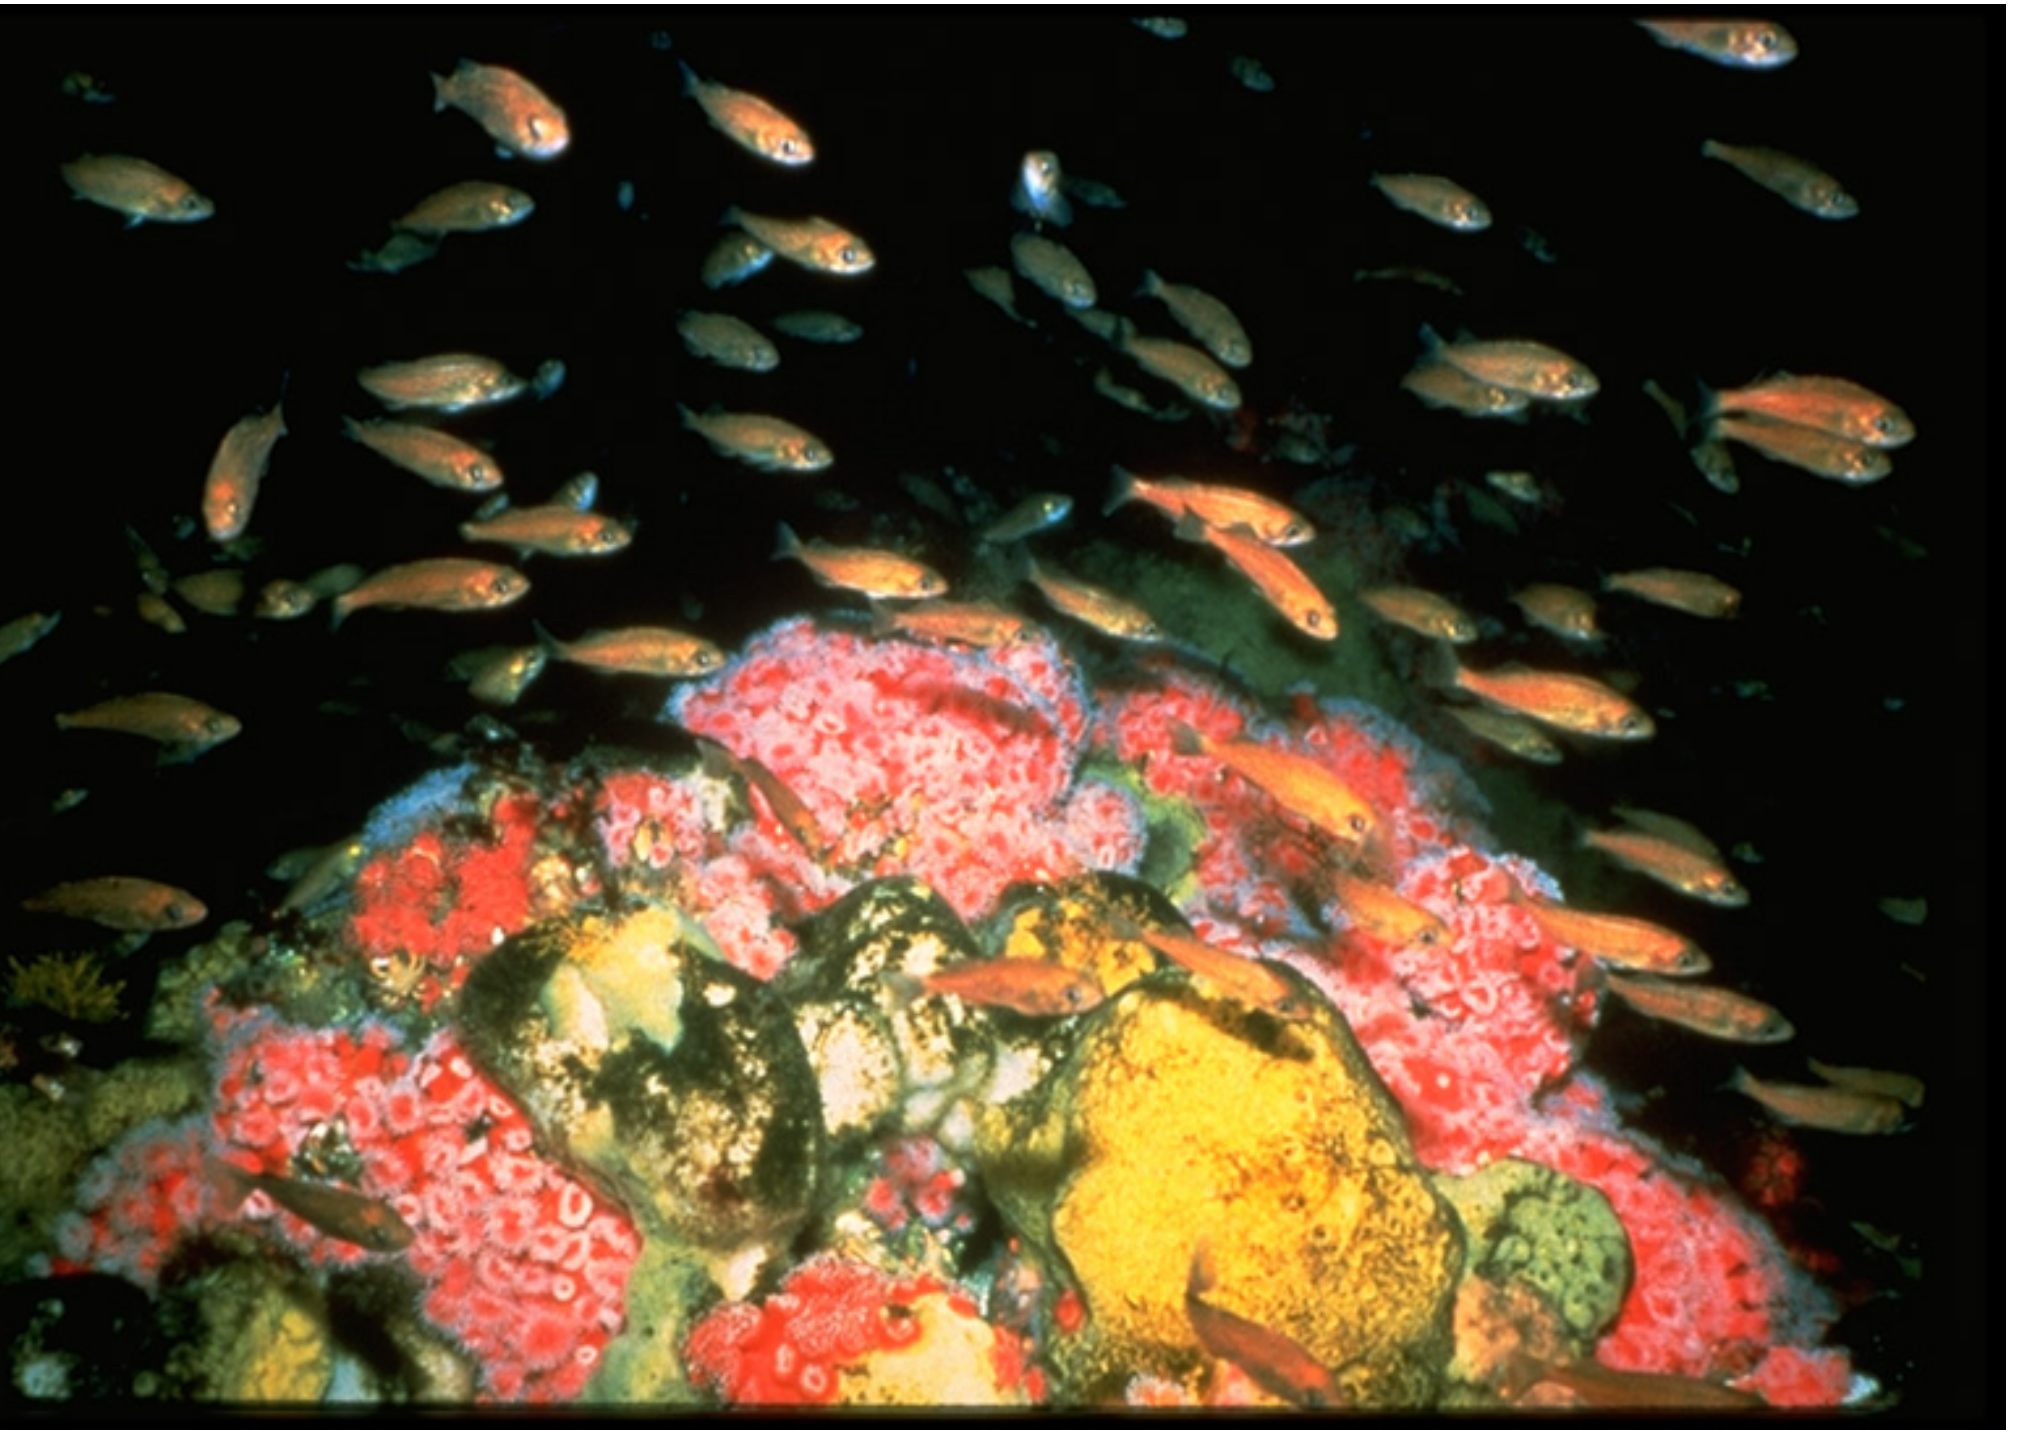

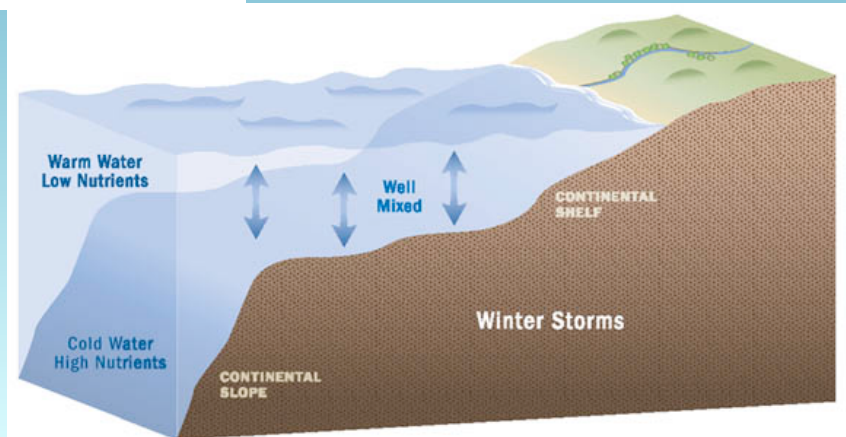

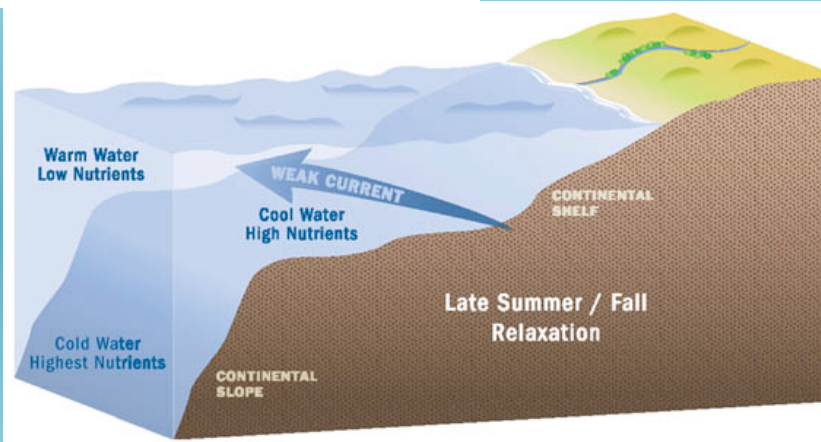

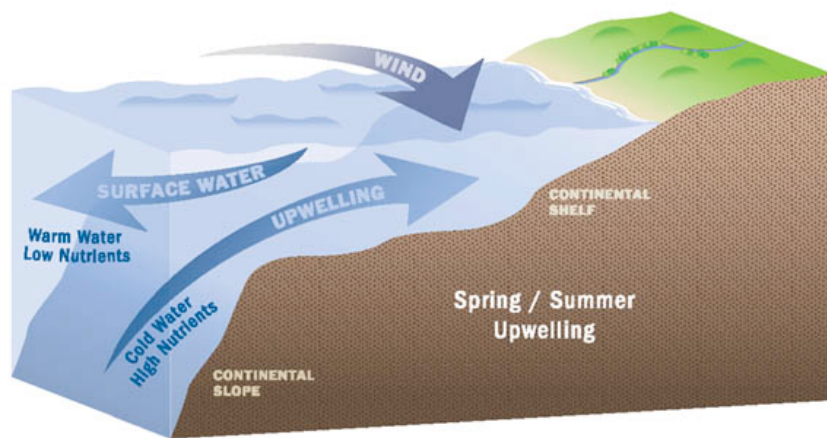

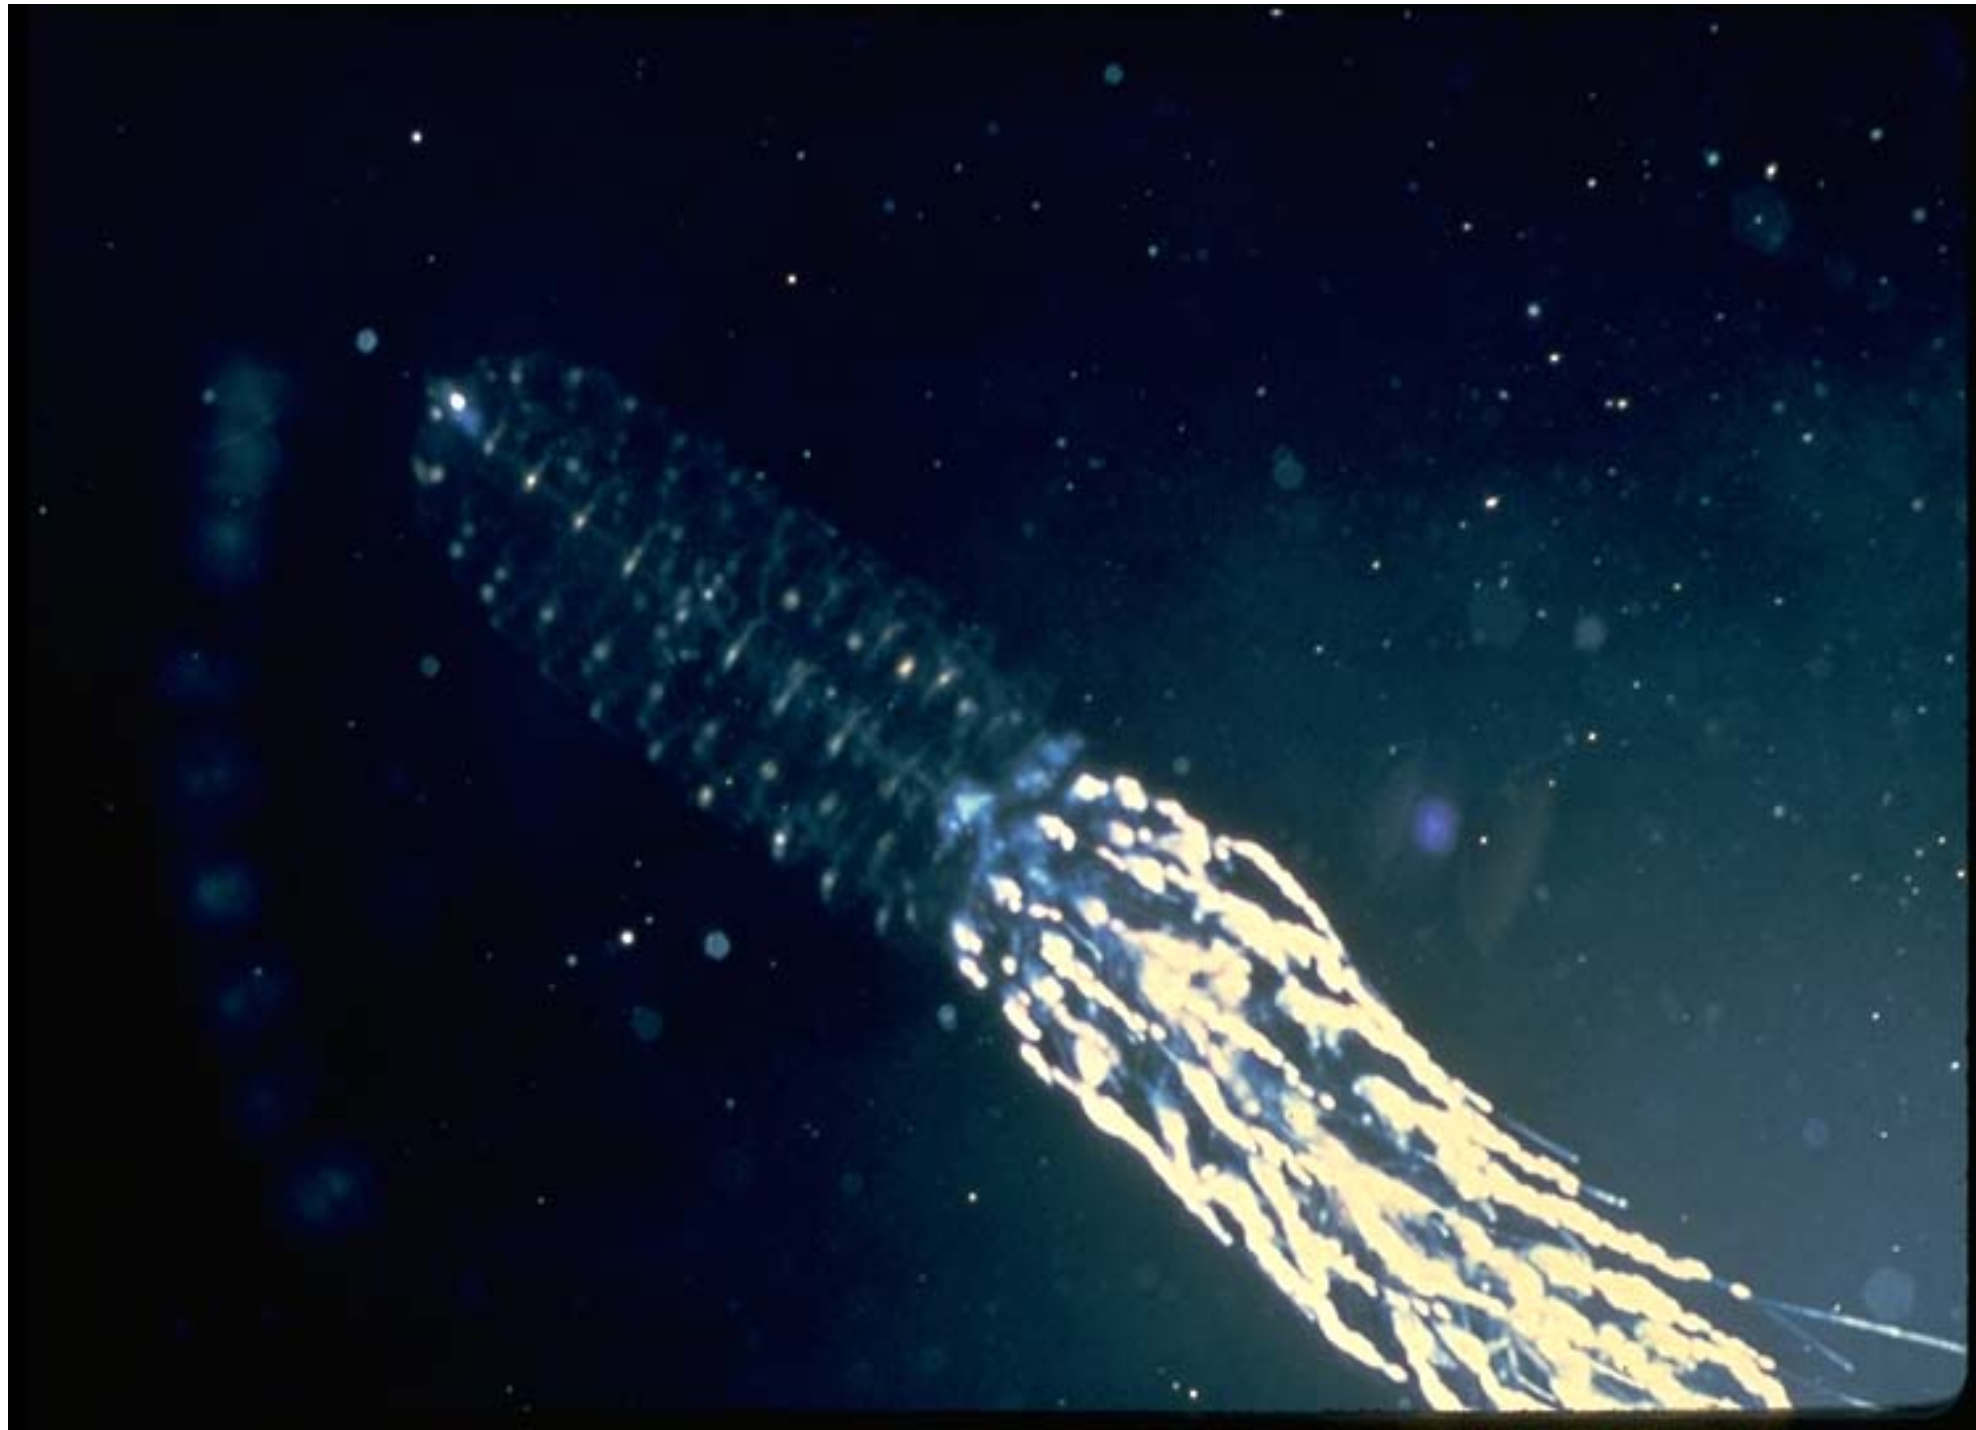

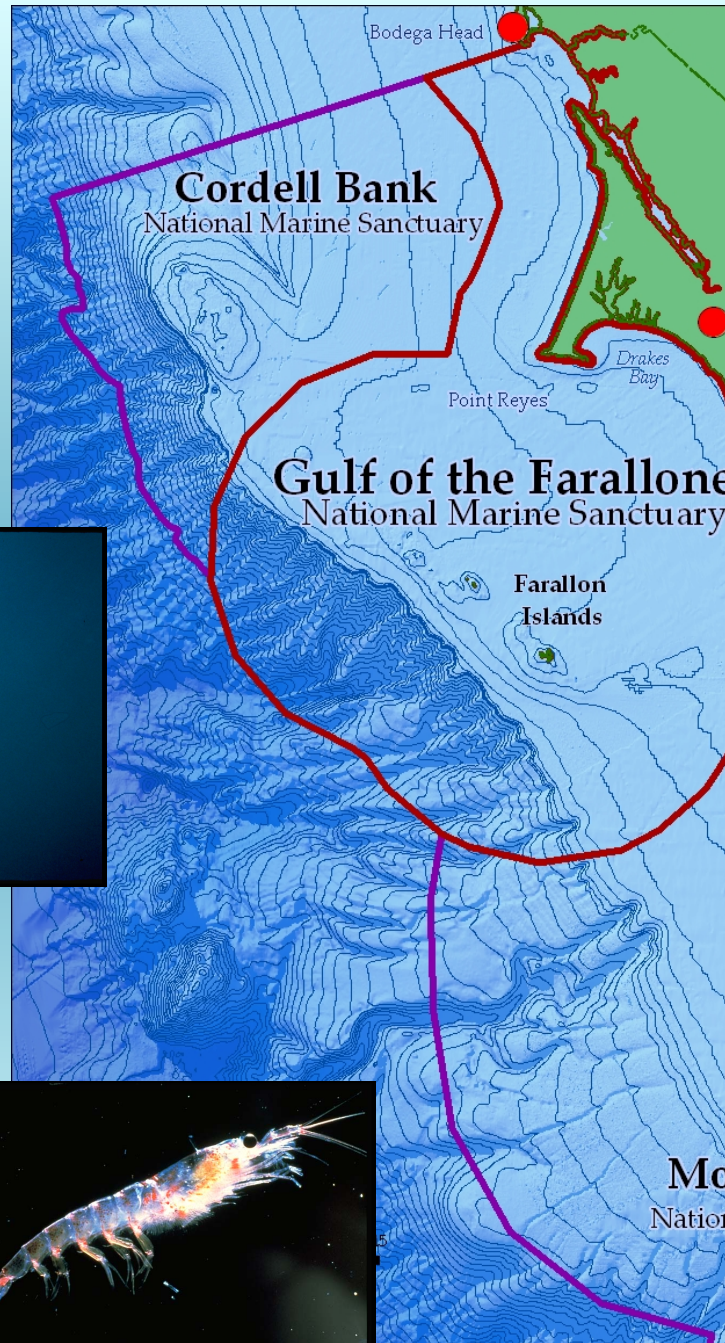

A World Class Icon For Marine Stewardship

Research • Education • Conservation • Stewardship

Conservation Science Research Programs

- Sanctuary Ecosystem Assessment Surveys (SEAS)
- Beach Watch

Education & Outreach Programs

- School Programs

Visitor Center, *At Your School*, LiMPETS, Teacher Workshops

- Public Programs

Exhibits, Lectures, Workshops, Excursions, Summer Camps, Outreach

- Sanctuary Issues

Seabird Protection, Rocky Shore Protection, Shark Protection

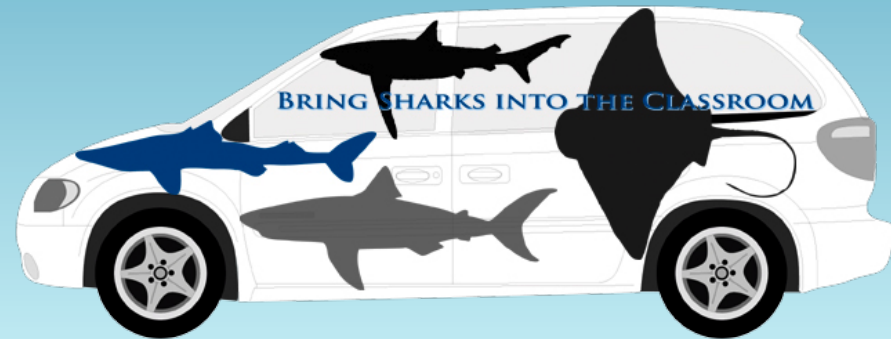

Sharkmobile - An *At Your School* Program

- Bringing shark biology, natural history, conservation and myth-busting to fourth, fifth and sixth grade students throughout the Bay Area since 2004.

- Visited over 350 classes with over 10,300 participants in the last 6 years.

Sharks of the Sanctuary

Public Program

- A two-hour workshop at the Sanctuary Visitor Center
- For shark enthusiasts of all ages
- Includes:
 - Underwater shark footage
 - Information on shark biology and conservation
 - A shark “dissection” of our 14-foot white shark model
 - Updates on current shark research in the GFNMS and beyond
 - Shark print-making with Lino blocks

Resource Protection Conservation Programs

- Seabird Protection Network
- Bolinas Lagoon Restoration Plan
- Ocean Climate Change Initiative
- White Shark Stewardship Project

Climate Change Initiative

- New Report released in June 2010

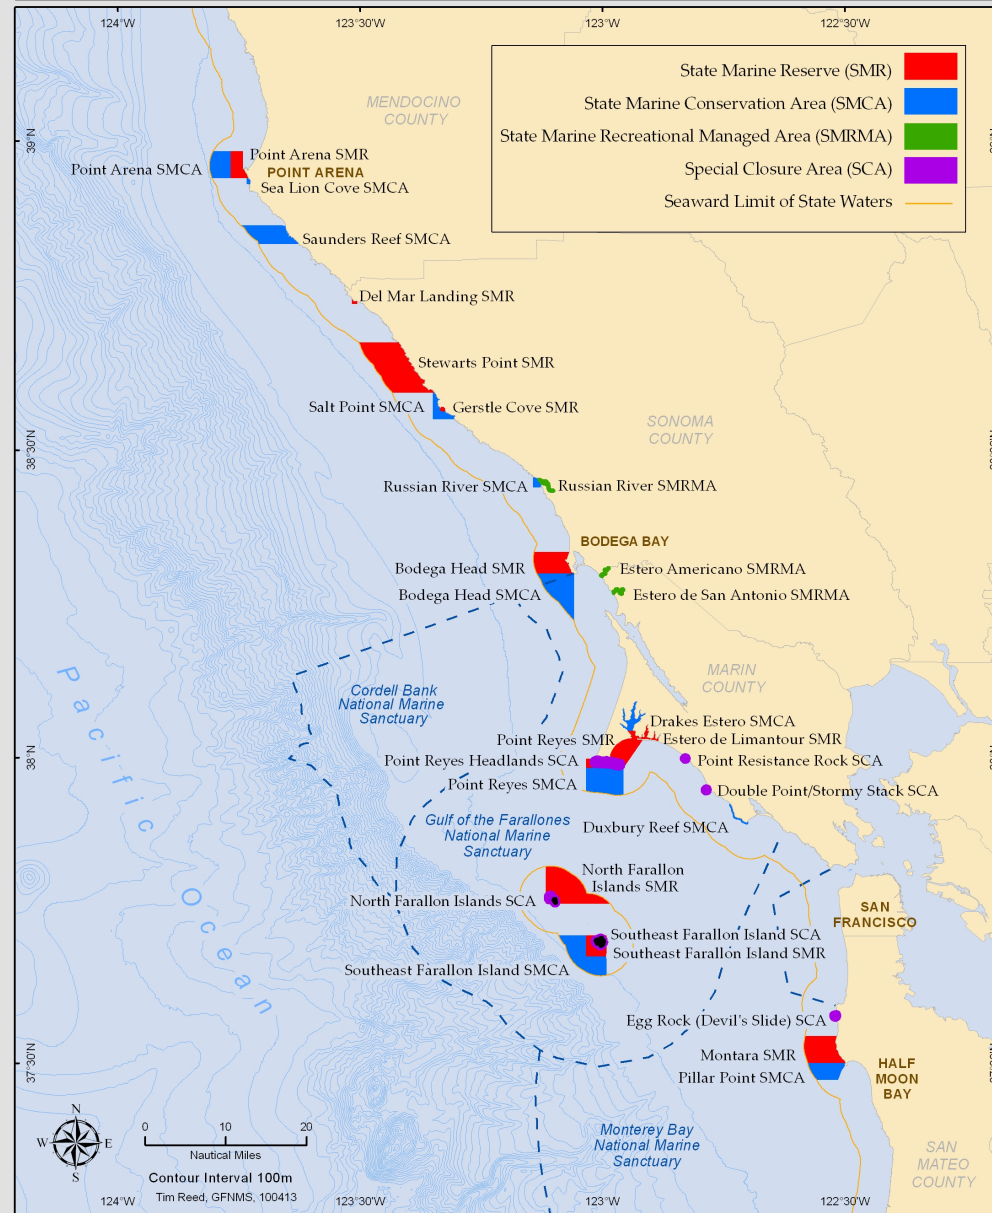

"Climate Change Impacts: Gulf of the Farallones and Cordell Bank National Marine Sanctuaries"

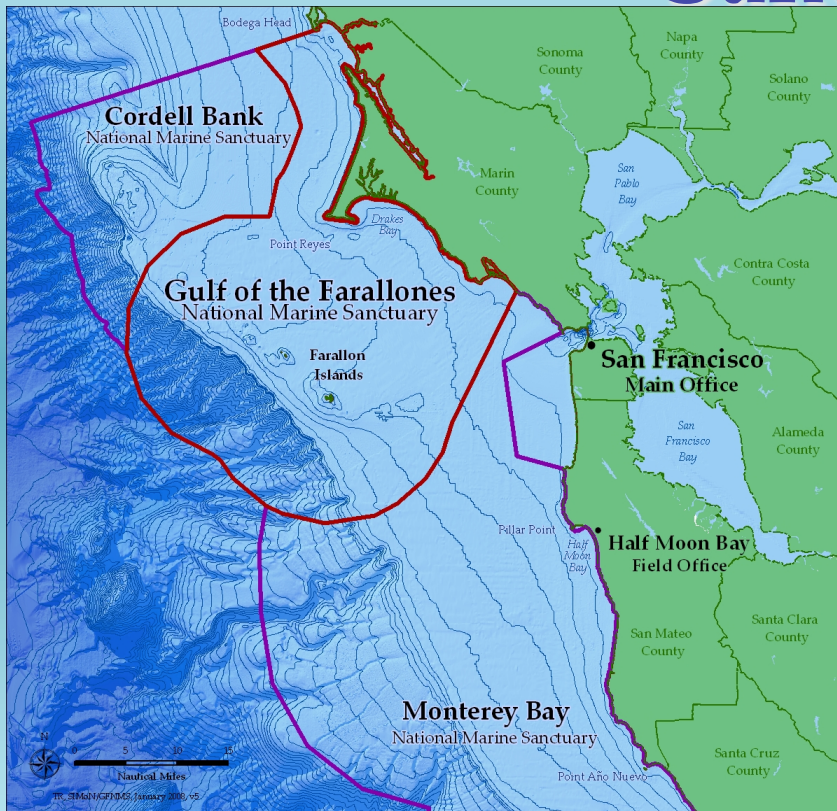

- To download the report, go to -

<http://farallones.noaa.gov/eco/climate/climate.html#report>

NEW MARINE PROTECTED AREAS

The Farallon Islands and the Sanctuary

- Islands managed by U.S. Fish and Wildlife Service since 1969
- The Sanctuary manages the water around the islands.
- The two agencies often collaborate and consult on many issues.

Research • Education • Conservation • Stewardship

A Bit More About the Farallon Islands

- The Islands were known by the native peoples along the coast, but are not thought to be used by them.
- Sir Frances Drake is believed to be the first European to record the islands. He landed on the Islands in July of 1579.
- First human habitation - during the Russian Fur trade era - early 1800's. The Islands became an important source of eggs, blubber and pelts.
